

Kako odložiti otpad?

How to Dispose of Waste?

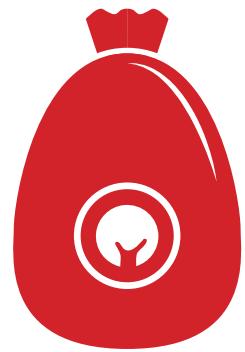

PLASTIKA / PLASTIC

OSTALI OTPAD / OTHER WASTE

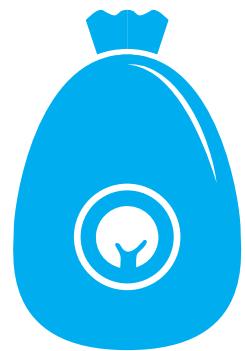

KONZERVE / CANS

STAKLO / GLASS

PAPIR / PAPER

Vreće za odvajanje
otpada možete dobiti
od svog iznajmljivača.

You can get waste
sorting bags in your
holiday apartment.

→ otpad → uredi + kune → uštedi →

Naviku usvojimo i otpad odvojimo!

Let's adopt good habits and separate waste!

Vrijeme je da prestanemo odlagati otpad i počnemo gospodariti otpadom!

It is time for us to reduce landfill waste and start managing waste!

Gospodarenjem otpadom smanjujemo troškove za sirovine, štedimo energiju, zdravije živimo i osiguravamo bolju budućnost svojoj djeci.

With waste management, we reduce the costs of raw materials, save energy, live healthier, and secure a better future for our children.

Ponovna upotreba drugi je najpoželjniji oblik postupanja s otpadom, odmah nakon sprječavanja nastanka otpada.

Re-use is the second most desirable form of waste handling, right after prevention of waste generation.

Recikliranje je pretvaranje sakupljenih proizvoda u materijale iz kojih će nastati novi proizvod.

Recycling is transforming collected products into materials which will create a new product.

Otpad su tvari i predmeti koje planiramo odbaciti jer nam više ne trebaju, ali se mogu ponovno iskoristiti ili reciklirati. Smeće je otpad kojim se neprimjereno ili pogrešno rukuje. Miješanjem različitih vrsta otpada nastaje smeće koje je vrlo teško i samo djelomično moguće reciklirati uz visoke troškove.

Waste are substances and objects we plan to discard because we no longer need them, but they can be re-used or recycled. Garbage is waste handled improperly. Garbage is created by mixing different sorts of waste and it is very hard to recycle; it is only partially recyclable at high costs.
